Exercise 1 *When studying trigonometry, you will learn that both* sin *and* cos *are periodic functions with period* 2π.

Many functions that can be built out of sin *and* cos *are also periodic. In this exercise, we'll use Desmos to explore how the period can change.*

(a) *Consider the function* f *defined by* $f(x) = \sin(3x)$. *For reference, here is a graph of* f *on Desmos:*

(iv) 6π.
(v) $\frac{\pi}{2}$.
(vi) $\frac{2\pi}{3}$. ✓

(b) *Consider the function* g *defined by* $g(x) = \cos\left(\frac{x}{3}\right)$. *For reference, here is a graph of* g *on Desmos:*
