

Exercise 1 When studying trigonometry, you will learn that both \sin and \cos are periodic functions with period 2π . This means that for all inputs x , $\sin(x + 2\pi) = \sin(x)$ and $\cos(x + 2\pi) = \cos(x)$.

(a) Consider the function f defined by $f(x) = 2\sin(x)$. f is

Multiple Choice:

- (i) not periodic.
- (ii) periodic with period π .
- (iii) periodic with period 2π . ✓
- (iv) periodic with period 3π .
- (v) periodic with period 4π .

(b) Consider the function g defined by $g(x) = \cos(x + 5)$. g is

Multiple Choice:

- (i) not periodic.
- (ii) periodic with period π .
- (iii) periodic with period 2π . ✓
- (iv) periodic with period 3π .
- (v) periodic with period 4π .

(c) Consider the function h defined by $h(x) = \sin(x) + 2\cos(x)$. h is

Multiple Choice:

- (i) not periodic.
- (ii) periodic with period π .
- (iii) periodic with period 2π . ✓
- (iv) periodic with period 3π .
- (v) periodic with period 4π .
